Coehre conference '09 Tallinn, Estonia

Health of migrants and displaced persons
 Implications for education

22 - 24 April 2009

Staff programme

Student programme

The Coehre council and the Tallinn Health College conference organization team invite you to Estonia this coming April!

This interprofessional conference will offer you opportunities to meet and greet other Coehre members and will enable you to share experiences with colleagues and to engage in joint activities.

The Conference will bring you presentations and discussions on the interesting and important theme of "Health of migrants and displaced persons - implications for education". Interesting keynote speakers will share with you their research and experiences. They will analyse, illuminate and identify relevant aspects for educational practice. They will challenge you to accommodate your curricula to the realities of professional practice. Students and professors will meet each other during the plenary sessions and have their separate activities in between.

We particularly hope that this conference will be a source of inspiration for cooperation with partner members of Coehre; actual cooperation in joint projects, research and educational activities that support the innovation, development and improvement of education in our institutions.

We are confident that this conference will have an activating influence on all participants; socially, intellectually, as well as psychologically. We look forward with great pleasure and enthusiasm to meeting you all in Tallinn 22-24 April 2009.

Cor Segeren
President Coehre
