I don't need more and it's cheap

Because I'm Erasmus student and after 3 months I will back in my town.

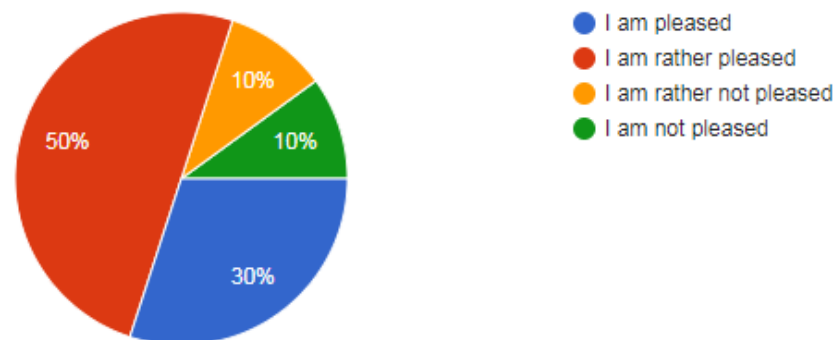

It's cheap and I like my roommate

I don't have where else to go

The location of the student hostel is really good, I can walk to school, go to hospital in 15 mins with bus, bus stations are near. I can make friends in hostel. Also prices are so fair and cheap.

There are everything what I need.

Generally I am pleased. I'm living in first floor and every room's conditions are different. Me and my roommates don't have enough wardrobe for us. But some of the rooms have enough space. Also size of the rooms are different. It's not fair. In my opinion every room has same furnitures and same conditions.

We don't have enough plates, forks, spoons...

The kitchen is too small

There are everything what I need, but the kitchen is untidy after other people.

I'm in the first floor. Our kitchen has every material that you can cook it is perfect but size is really small. Most of time someone can't find space for cook or eat. I saw 5th floor's kitchen it was really big. I don't know why ours is so small.

### 34. Your suggestions for improving the living conditions in the Student Hostel:

10 responses

The administrative should speak English. More plates and forks, spoons...

More furnitures in the room, bigger fridge, bigger kitchen, more plates and glasses, new pans to cook

They have to Change all things

Soap in the Bathroom

Everything is good here, now I don't see any conditions improve it.

Better Wifi, being more strict about the quite time, improving the furniture.

Buy new pans. Add One room with sofas (living room) to be talking there and not into the kitchen bothering people who wants to eat peacefully. More bathrooms for women. More furniture in the rooms for three people.

Buy new pans, cutlery, dishes...

Have a living room with sofas to stay there talking because now there is only the kitchen.

More bathrooms for women.

I don't have

You can do something for kitchen for more space. And my biggest problem is every room has different conditions this is really unfair.
